

Can Am Intervention Services

Intervention Services: Can Am Interventions provides drug & alcohol and complex mental health intervention counseling to break the cycle of destructive behaviors from the devastating and deadly disease of addiction for adults, adolescents & their families. The process of an intervention is a three day process using both surprise and invitational interventions models, preparing the intervention group with education/process groups using evidence based practices, treatment planning and transport the patient into treatment. Can Am Interventions also provides 3-6 months of case management/aftercare post intervention services, makes referrals to other professionals in the community and takes each intervention case at face values to best assess and create a treatment plan that will fit the family's needs.

Recovery Management Support Services: Can Am Interventions provide a complete continuum of services to help those struggling with addiction using a recovery management approach that can work with patients and families in the privacy of their own home and/or in the community. We use family consultants, companionship and monitoring services to promote personal responsibility and accountability 24/7 days a week.

Addiction and Mental Health Referral Services: Can Am Interventions offers a full-range of community-based addiction and mental health referral services such as residential, outpatient, and intensive day program models. Our goal is to work closely with patients and families while patients are accessing these services. It is an extra assurance that patients can transition into the community with support networks.

Treatment Referrals: Can Am Interventions provide screening and assessment processes by helping families and identified patients gain the best evidence based treatment program that fits their budget, as well as gathered medical insurance information.

Family Treatment Planning: Can Am Interventions provides a comprehensive quality of care treatment plan for substance abusers and co-occurring disorder individuals and/or families using a set of tools and strategies that address the strengths and problems. Our strategy is to incorporate a community-based

approach through professional partnerships providing a clear framework for recovery stages.

Relapse Prevention: Can Am Interventions offer community based resources to support persons with chronic relapse episodes. By addressing attachment issues for persons struggling to transition from inpatient treatment back into the community, we help the individual learn life skills and address self-identification issues.

Family Case Management Services: Can Am Interventions will offer support to families and help monitored patient while in treatment programs. It is very important to engage families and their addicted person to build mutual trust and respect between them while the patient is in treatment. This, in turn, often leads to more successful outcomes. This relationship can be built upon when problems arise. In the presence of open communication, families and helpers can work together to identify the informal and formal supports that can reduce or eliminate the factors causing harm or risk.

Sober & Travel Companionship: Can Am Interventions will offer this services for persons that are not ready for inpatient treatment which can help persons to stay safe and work towards treatment goals. Also sober companionship can also attained for persons that are leaving treatment that need that additional support.

Life Coaching: Can Am Interventions concentrates on client's stages in recovery and coaches actions accordingly. Most persons that have difficulties with addiction / mental health struggle with consistency, and many areas of their lives suffer which affects self-esteem and self-confidence. Our goal is that provides Life Coaching to support, build a strong foundation for clients, to gain daily structure, personal accountability and responsibility for long terms recovery.
